

KULDEEP KAUR

Software Developer In Test

✉ kaur.kuldeep.cheema@gmail.com  linkedin.com/in/kuldeepk-kaur/  github.com/kuldeepk-kaur

ABOUT ME

- Around 5 years of experience as QA analyst; Equally proficient in both Manual and Test automation.
- Manual: I see a problem repeating, then I come up with a process and then try to improve the process.
- Automation: You define a clear goal, I achieve it. You provide me bird's eye view, I will make it happen.
- Always push my limits to learn new tools so that work would be easy to have more productivity.
- Firm believer in team effort, SCRUM and DevOps culture.

EXPERIENCE

Software Developer In Test (SDIT)

Mar 2020 - Present

Bill.com

- For now, 100% Automated "Approval workflow", "Bills" modules and maintaining it.
- Reduced manual regression for various modules, "Payments Out", Invoice processing, Integrations and Messages.
- Wrote stubs to simulate third party payment validations.
- Wrote helper functions to create independent test data and to delete test data, using APIs.
- Made sure that test environments doesn't have redundant test data by defining cleanup cycles jobs.
- Wrote DB scripts to anonymize prod data in test environments.
- Implemented Testrail integration with test framework to create a test plan and to update test results in Testrail.
- Focused on prod issues to understand vulnerable areas and added regression coverage.
- Updated test framework to run for various clients and for vanilla features.

Software QA Analyst

Oct 2017 - Feb 2020

Rippling Inc.

- As manual QA, worked and supported for two major releases.
- Participated Go-NoGo meetings for high visible feature releases.
- Became a module owner for functional doubts and testing activities.
- Maintained test plans and reports and presented to management.
- Contributed to Agile ceremonies and understood QA processes.
- Started as intern QA analyst and supported QA team in writing test cases.

SKILL SET

- Build and maintain test automation framework with Java or JavaScript.
- Mobile test automation with Appium.
- Test automation on Android and iOS devices.
- Web test automation with Selenium WebDriver.
- Creating custom integrations for test automation.
- API test automation with POSTMAN and Java.
- Test on production without impacting real customer/data.
- Analyzing prod issues and defining quality gates.
- User story analysis and writing test cases.
- Following Agile process and actively participating.
- Creating test plans, executing and Reporting.

Proficient in:

- JIRA
- Confluence
- TestRail
- SQL
- UNIX
- HTML/CSS
- POSTMAN
- Newman
- Agile/SCRUM
- Swagger
- Datadog
- Deepcrawl
- SendGrid
- Applitools
- Charles Proxy
- Core Java
- TestNG
- Selenium WebDriver
- Maven
- Gradle
- Cucumber
- Gherkin
- Allure
- IntelliJ IDEA
- Slack
- Jenkins
- GitHub/BitBucket
- JavaScript
- WDIO
- Appium
- XCode
- Simulator
- Android Studio
- BrowserStack
